

Fit for Third-Party Funding

Objective

This online workshop will present the key elements researchers need for planning and preparing an application for their **own funding** after the completion of a doctorate. The participants need no prior experience in applying for third-party funding.

Description

A successful academic career includes the acquisition of third-party funding as a main applicant from research organizations such as the DFG.

This workshop offers information on the theoretical part of such an application - from planning to submission!

- Find the right funding scheme for your career phase and acquaint yourself with the specific requirements (Examples will be provided).
- Planning a convincing research application for your career development:
How important are clear career goals?
How important is it to be the main applicant, and why?
4-step model of plan-and-prepare
- Which key elements make up a successful application strategy?
- Writing the application: the most important elements for a convincing project design and application
- Tips & tricks, dos & don'ts

Methodology

- Theory with practical & interactive exercises, a lot of time for Q&A

Conditions

- Online workshop: Zoom (Obligatory: headphones with microphone, open webcam during entire workshop, room without disturbances)
- Persons who have already participated in this workshop (in German or English) will not be considered for registration again.
